

New Hampshire Broadband Mapping Initiative

Town of Henniker, NH

This map depicts broadband service for the town of Henniker, NH. Broadband service is categorized as Served, Underserved, or Unserved. Served locations are defined by wired internet connections with downstream speeds of at least 100 Mbps and upstream speeds of at least 20 Mbps. Underserved locations are defined by internet service slower than these speeds. All others are categorized as Unserved, including locations with only wireless or satellite service. Road segments display the service category for adjacent address locations. Hexagons display the percentage of address locations classified as Served.

Summary data tables for the town include service category percentages, a list of providers currently offering service, and a list of available technology types. This map represents the seventh iteration of data collection for the NHBMI. Participating service provider data are current as of December 31, 2025 and Capital Projects Fund "Passings" data as of March 1, 2026 are included.

Unserved (%)	Underserved (%)	Served (%)
1.1	5.3	93.6
